Re: Indian Point Unit No. 2  
Docket No. 50-247

Director of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

ATTN: Mr. Steven A. Varga, Chief  
Operating Reactors Branch No. 1  
Division of Licensing

Dear Mr. Varga:

As a result of a telephone conversation with your staff on December 2, 1985, we have revised our proposed amendment to Indian Point Unit 2 Technical Specification 3.8 by adding items 7 and 8 to Section 3.8.A. Section 3.8.B of the technical specification has also been revised to be consistent with section 3.8.A and to incorporate changes resulting from the issuance of License Amendments 98 and 103. A copy of the revised technical specification pages is attached. The original amendment request was transmitted to you by a letter dated February 14, 1983 and was subsequently revised by our submittal dated August 14, 1985 to incorporate an earlier request for revision from your staff. This transmittal represents revisions to our previous submittals and we anticipate that it will resolve all of your concerns.

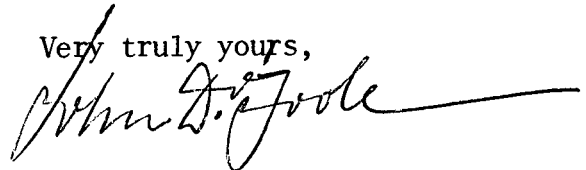

This revision includes additional restrictions in Section 3.8.A which do not affect plant safety. We have determined that the safety assessment submitted with our original application remains unaffected and fully applicable.

Please note that the proposed addition (item 8 in Section 3.8.A) references Technical Specification 3.6.A.1, and that by a letter dated August 6, 1985 we proposed a revision to the Technical Specification 3.6. Hence we request that issuance of revisions to Technical Specifications 3.6 and 3.8 be coordinated and delayed until return to service from Cycle 7/8 refueling outage to avoid implementation and schedule problems.

Should you or your staff have any questions, please contact us.
