Division of PWR Licensing - A

Re: Consolidated Edison Company of New York, Inc.
(Indian Point Station, Unit No. 2)
Docket No. 50-247

Dear Mr. Varga:

Transmitted herewith are three (3) originals and forty (40) copies of "Application for Amendment to Operating License", sworn to on June 3, 1986. The Application requests an amendment to the Indian Point Unit No. 2 Technical Specifications to modify the actions required when the quadrant power tilt limits are exceeded. This change is being requested to eliminate unnecessary cyclic loads on the reactor coolant system and to add a conservative limitation on reactor core power level when a tilt condition exists.

The appropriate filing fee, in accordance with 10 CFR 170.12, is enclosed along with an Affidavit of Service attesting to state and local notification as required by 10 CFR 50.91.

Very truly yours,

encl.
