Re: Indian Point Unit No. 2  
Docket No. 50-247

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

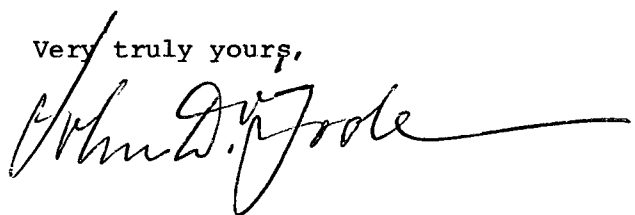

Dear Mr. Denton:

In accordance with 10 CFR 50.71(e), Consolidated Edison Company of New York, Inc. hereby submits one signed original and twelve (12) copies of Revision 4 to the Updated Final Safety Analysis Report (FSAR) for Indian Point Unit No. 2. As also required by 10 CFR 50.71(e)(2), enclosed with this letter is my certification, as a duly authorized officer of Consolidated Edison.

This submittal provides the fourth annual revision to the Updated FSAR submitted on July 22, 1982. As required, this submittal brings the Updated FSAR current as of a time no more than six months prior to the date of this letter. All changes made under the provisions of 10 CFR 50.59 are reported pursuant to 10 CFR 50.59(b).

Should you or your staff have any questions, please contact us.

Very truly yours,

Enclosure

(Indian Point Station, ) Docket No. 50-247  
Unit No. 2)

Certification for Updated Final  
Safety Analysis Report

I, John D. O'Toole am a Vice President of Consolidated Edison Company of New York, Inc. Revision 4 to the Updated Final Safety Analysis Report (FSAR) for Indian Point Unit No. 2 was prepared pursuant to the requirements of 10 CFR 50.71(e) at my direction and under my supervision. I believe the contents thereof to be true and accurate based upon my personal knowledge and upon information which I have received from other company officials and our consultant that I believe to be reliable, and that said contents reasonably present changes to the subject facility made since the previous submittal, necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirements or made under the provisions of 10 CFR 50.59 but not previously submitted to the Commission.

Revision 4 to the Indian Point Unit No. 2 Updated FSAR was prepared by SAI Corporation under contract to Consolidated Edison, and has received a broad review within Consolidated Edison. Based on these efforts, I believe that Revision 4 to the Updated FSAR accurately presents changes made to the facility as of a time no more than six months prior to this date. Any editorial or technical discrepancies discovered following submittal of this document will be corrected in the next annual revision due in 1987.

John D. O'Toole  
Vice President
