Operating Reactors Branch No. 1  
Division of Licensing

Re: Consolidated Edison of New York, Inc.  
(Indian Point Station, Unit No. 2)  
Docket No. 50-247

Dear Mr. Varga:

Transmitted herewith are three (3) originals and forty (40) copies of an "Application for Amendment to Operating License", sworn to on July 24, 1986. This Application requests an amendment to the Indian Point Unit No. 2 Technical Specifications.

The proposed Technical Specification changes, contained in attachment A to this Application, revise the limiting conditions for operation (LCOs) and surveillance requirements for a severe hurricane condition in the vicinity of Indian Point Unit No. 2 (IP-2). These changes are a result of our review of historical hurricane track data for the eastern coast of the United States and our recent experience with Hurricane "Gloria" in relation to the existing IP-2 Hurricane Technical Specifications. A Safety Assessment is presented in Attachment B to the Application and provides the No Significant Hazards analysis for the proposed amendment.

The appropriate filing fee, in accordance with 10 CFR 170.12 is enclosed along with an Affidavit of Service attesting to state and local notification as required by 10 CFR 50.91.

Very truly yours,

*John D. O'Toole*
