Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Proposed Technical Specification Amendment to Remove Fire
Protection Requirements

Transmitted herewith are the original and three (3) copies of an "Application for Amendment to Operating License", sworn to on October 13, 1987. This Application requests an amendment to the Indian Point Unit No. 2 Technical Specifications and license conditions 2.C.(2) and 2.K.

The Technical Specifications changes, contained in Attachment A to this Application, are requested in order to remove fire protection requirements in accordance with Generic Letter 86-10. Accordingly, the fire protection requirements removed by the proposed changes to the Technical Specifications, as specified in Attachment A, have been incorporated in the document entitled, "Indian Point Unit 2 Fire Protection Program Plan," submitted under separate cover, which is referenced as part of the updated FSAR, and implemented by plant procedures. In addition, our August 2, 1985 submittal on fire protection Technical Specifications is now superseded and no longer required as a result of Generic Letter 86-10. A Safety Assessment is presented in Attachment C to this Application and provides the "No Significant Hazards Consideration" analysis for the proposed amendment.

The appropriate filing fee, in accordance with 10 CFR 170.12 is enclosed along with an Affidavit of Service attesting to state and local notification as required by 10 CFR 50.91.

Very truly yours,

Murray Selman
