Certification for Updated Final  
Safety Analysis Report

I, Stephen B. Bram am a Vice President of Consolidated Edison Company of New York, Inc. Revision 6 to the Updated Final Safety Analysis Report ("UFSAR") for Indian Point Unit No. 2 was prepared pursuant to the requirements of 10 CFR §50.71(e) at my direction and under my supervision. I believe the contents thereof to be true and accurate based upon my personal knowledge and upon information which I have received from other company officials and our consultant that I believe to be reliable, and that said contents reasonably present changes to the subject facility made since the previous submittal, necessary to reflect information and analyses submitted to the Commission or prepared pursuant to Commission requirements or made under the provisions of 10 CFR §50.59 but not previously submitted to the Commission.

Revision 6 to the Indian Point Unit No. 2 Updated FSAR was prepared by SAI Corporation under contract to Consolidated Edison, and has received a broad review within Consolidated Edison. Based on these efforts, I believe that Revision 6 to the Updated FSAR accurately presents changes made to the facility as of a time no more than six months prior to this date. Any editorial or technical discrepancies discovered following submittal of this document will be corrected in the next annual revision due in 1989.
