Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
U.S. Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Technical Specification Amendment
Low Pressure Injection/Residual Heat Removal Check Valve
Surveillance

Transmitted herewith are the original and two (2) copies of an "Application for Amendment to Operating License," sworn to on December 28, 1988. This Application requests an amendment to the Indian Point Unit No. 2 ("IP-2") Technical Specifications. The proposed amendment, as set forth in Attachment I to this Application, revises Section 4.16.A to include an additional test requirement for Safety Injection System low head injection line check valves 897A-D and Residual Heat Removal check valves 838A-D. This action, when approved, will rescind the February 11, 1980 Confirmatory Order Item A.5 as discussed in the July 5, 1985 Rescission of the Confirmatory Order.

A safety assessment is presented in Attachment II to this Application and provides the "No Significant Hazards Considerations" analysis for the proposed amendment. Attachment III provides a description of certain editorial changes made which are administrative in nature.

Pursuant to 10 CFR §170.12, a check in the amount of \$150.00 is enclosed as payment of the application fee for the review of these proposed changes to the Technical Specifications. Pursuant to 10 CFR §50.91, a copy of this Application and the associated attachments are being submitted to the appropriate New York State official designated to receive such documents.

Should you or your staff have any questions regarding this matter, please contact Mr. Jude G. Del Percio, Manager, Regulatory Affairs.

Very truly yours,
