Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station Pl-137
Washington, DC 20555

SUBJECT: Steam Generator Tube Repair Technical Specification
(TAC. No. 65747)

This letter serves to notify you of our decision to withdraw the June 22, 1987 Application for License Amendment. The Application requested revision of our steam generator tube inservice surveillance program to authorize (but not require) sleeving as a repair technique.

The withdrawal was requested by your staff, citing the Commission's change in policy to no longer process applications such as this that do not refer to any particular methodology for sleeving (i.e., site-specific, vendor-specific analysis report).

Under these circumstances we plan to re-submit another application which will meet your new criteria. We request crediting to our account for all fees and charges incurred to date which are associated with this Application.

Should you or your staff have any questions regarding this matter, please contact Mr. Jude G. Del Percio, Manager, Regulatory Affairs.

Very truly yours,

8904200121 890406
