NUCLEAR REGULATORY COMMISSION

In the Matter of )  
 )  
CONSOLIDATED EDISON COMPANY ) Docket No. 50-247  
OF NEW YORK, INC. )  
(Indian Point Station, )  
Unit No. 2) )

APPLICATION FOR AMENDMENT  
TO OPERATING LICENSE

Pursuant to 10 CFR 50.90 of the Regulations of the Nuclear Regulatory Commission ("NRC"), Consolidated Edison Company of New York, Inc. ("Con Edison"), as holder of Facility Operating License No. DPR-26, hereby applies for amendment of that license. Specifically, we request that Technical Specification 3.3.B.2 be amended to provide a correction to the Limiting Condition for Operation (LCO) for the Containment Spray System Valves and to provide an LCO for the Spray Additive Tank and we request that Technical Specification 3.7.B be amended to provide an LCO for the Battery Chargers associated with Station Batteries Nos. 21, 22, 23 and 24.

The specific proposed Technical Specification revisions are set forth in Attachment I to this Application. A Safety Assessment for the proposed changes is set forth in Attachment II to this Application. This assessment demonstrates that the proposed changes do not represent a "Significant Hazards Consideration" as defined in 10 CFR 50.92(c).

As required by 10 CFR 50.91(b)(1), a copy of this application and our analysis concluding that the proposed changes do not constitute a "Significant Hazards Consideration" have been provided to the appropriate New York State official designated to receive such amendments.
