Re: Indian Point Unit No. 2  
Docket No. 50-247

Document Control Desk  
US Nuclear Regulatory Commission  
Mail Station P1-137  
Washington, DC 20555

Subject: Withdrawal of Proposed Technical Specification Amendment to Remove  
Fire Protection Requirements

By letter dated October 13, 1987, Con Edison submitted an "Application for Amendment to Operating License" requesting an amendment to the Indian Point Unit No. 2 Technical Specifications and license condition 2.K. These changes were requested in order to remove fire protection requirements and add the license condition in accordance with Generic Letter 86-10, "Implementation of Fire Protection Requirements".

Subsequent to this submittal, Generic Letter 88-12, "Removal of Fire Protection Requirements from Technical Specifications", was issued to provide guidance for the preparation of a license amendment request to implement Generic Letter 86-10. Our previous submittal is not consistent with the guidance provided in this later generic letter. Therefore, we hereby withdraw our October 13, 1987 "Application for Amendment to Operating License". We will consider providing a future submittal to delete fire protection requirements from Technical Specifications based on the Generic Letter 88-12 guidance.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,
