Re: Indian Point Unit No. 2  
Docket No. 50-247

Document Control Desk  
US Nuclear Regulatory Commission  
Mail Station P1-137  
Washington, DC 20555

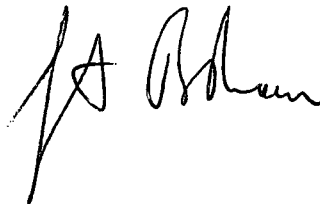

SUBJECT: Proposed Amendment to Technical Specification  
Regarding Snubbers

Transmitted herewith are the original and two copies of an "Application for Amendment to Operating License", sworn to on August 7, 1992. This Application requests an amendment to the Indian Point Unit No. 2 Technical Specifications.

The proposed Technical Specification changes, contained in Attachment A to this Application, involve the removal of the snubber listing, Table 3.12-1, contained within Technical Specification 3.12. This request is in accordance with NRC Generic Letter 84-13, dated May 3, 1984, and Generic Letter 91-08, dated May 6, 1991. The first generic letter permits licensees to remove snubber listings from Technical Specifications, and the second generic letter addresses administrative controls for component lists that are removed from Technical Specifications. A Safety Assessment is presented in Attachment B to the Application and provides the "No Significant Hazards Consideration" determination for the proposed amendment.

In accordance with 10 CFR 50.91, a copy of this application and the associated attachments are being submitted to the designated New York State official. Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

170099
