

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of)

CONSOLIDATED EDISON COMPANY)
OF NEW YORK, INC.)
(Indian Point Station,)
Unit No. 2))

Docket No. 50-247

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission ("NRC"), Consolidated Edison Company of New York, Inc. ("Con Edison"), as holder of Facility Operating License No. DPR-26, hereby applies for amendment of the Technical Specifications contained in Appendix A of that license.

Specifically, we request that the Technical Specifications be amended to remove Table 3.12-1 and to delete any references to the table from the List of Tables and Sections 3.12, 4.12 and 6.10.2.n. These changes are in accordance with the guidance contained in NRC Generic Letter 84-13, dated May 3, 1984. Relocation of the snubber listing to a plant procedure that is subject to the change control provisions of the Administrative Controls Section of the Technical Specifications will conform to the guidance contained in NRC Generic Letter 91-08, dated May 6, 1991.

The specific proposed Technical Specification revision is set forth in Attachment A to this Application. A Safety Assessment of the proposed changes is set forth in Attachment B to this Application. This assessment demonstrates that the proposed changes do not represent a significant hazards consideration as defined in 10 CFR 50.92(c).

As required by 10 CFR 50.91(b)(1), a copy of this application and our analysis concluding that the proposed changes do not constitute a significant hazards consideration have been provided to the appropriate New York State official designated to receive such amendments.
