Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

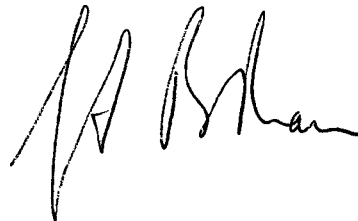

SUBJECT: Supplementary Information on the Proposed
Amendment to Technical Specifications Regarding
the New Fuel Storage Racks

By letter dated February 6, 1992, Consolidated Edison submitted an "Application for Amendment to Operating License." This application requested an amendment to the Indian Point Unit No. 2 Technical Specifications that would increase the maximum fuel enrichment limit to 5.0 w/o U235.

This letter requests that section 2.B.(2) of the Facility Operating License No. DPR-26 be updated to conform with this Technical Specification amendment. Accordingly enclosed is revised page 3 of the Facility Operating License No. DPR-26.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and License.

Very truly yours,

Enclosure

2. Facility Operating License No. DPR-26, as amended, issued to Consolidated Edison Company of New York, Inc., is hereby amended in its entirety to read as follows:

- A. This amended license applies to the Indian Point Nuclear Generating Unit No. 2, a pressurized water nuclear reactor and associated equipment (the facility), which is owned by Consolidated Edison Company of New York, Inc. The facility is located in Westchester County, New York, and is described in the "Final Facility Description and Safety Analysis Report" as supplemented and amended.
- B. Subject to the conditions and requirements incorporated herein, the Commission hereby licenses Consolidated Edison Company of New York, Inc.:
- (1) pursuant to Section 104b of the Act and 10 CFR Part 50, "Licensing of Production and Utilization Facilities" to possess, use, and operate the facility at the designated location in Westchester County, New York, in accordance with the procedures and limitations set forth in this license;
 - (2) pursuant to the Act and 10 CFR Part 70, to receive, possess, and use at any time special nuclear material as reactor fuel, in accordance with the limitations for storage and amounts required for reactor operation, as described in the Final Facility Description and Safety Analysis Report, as supplemented and amended and as described in the Commission's authorization through Amendment No. ____ to this license.
