License Nos.: 07-16199-02 and 07-16199-03
Docket Nos: 030-19939 and 030-32575
Control Nos: 144288 and 144289**

SUBJECT: Request for more information

This is in reference to our letter dated January 22, 2010, requesting to name Dr. Gerald Mandell as the Radiation Safety Officer for Nuclear Regulatory Commission Licenses Nos. 07-16199-02 and 07-16199-03. Dr. Mandell also serves as the Radiation Safety Officer at Phoenix Children's Hospital, Arizona Radiation Regulatory Agency License No. 2554845. Dr. Mandell assures our facility that he will function in the same capacity that he has over the past 10 -15 years when he has been our Radiation Safety Officer.

Although Dr. Mandell resides in Arizona, he is available to us through several avenues. We have his cell phone, home phone, work phone, home email address, and work email address. Dr. Mandell has his cell phone on him at all times in case of emergencies. Dr. Mandell will be involved in all Radiation Safety Committee meetings via telephone for his duration as Radiation Safety Officer. Dr. Mandell will be on site for a week or two over the summer months. During the time that he is on site, he will actively be involved in looking at policies and procedures and will be available to observe procedures and practices. Until he is on-site, Dr. Acikgoz and Kelly Sciole will be reviewing policies and procedures and contacting Dr. Mandell for his approval. Dr. Mandell has the full support of the Radiation Safety Committee as well as the full support of the Management Team here at A.I. duPont Hospital for Children. Both the Committee and Management team have given Dr. Mandell the full authority to make changes and recommendations as he sees fit. He will have all the authority that an on-site Radiation Safety Officer can expect to have. The Management team will support any funding request that Dr. Mandell deemed necessary. When confronted with radiation safety problems that would require attention, Dr. Mandell will be notified immediately. Dr. Acikgoz will also be notified and the delegation of any on site training that would be needed would be done by Dr. Gunsel Acikgoz, the Director of Nuclear Medicine and Kelly Sciole, Lead Technologist for Nuclear Medicine. Dr. Acikgoz and Kelly Sciole will be required to maintain all records of events, cause and effect, as well as any corrective actions taken.
