Re: Indian Point Unit No. 2  
Docket No. 50-247

Director of Nuclear Reactor Regulation  
ATTN: Mr. Thomas M. Novak  
Assistant Director for Operating Reactors  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Novak:

Your letter of July 21, 1980 requested information concerning the fracture-toughness design of the steam generator and reactor coolant pump supports at the Indian Point Unit No. 2 plant. We do not have in our possession the requested information, and have contacted Westinghouse for such. Westinghouse has advised us that approximately six months would be required to generate the response. We presently expect the information to be available by March 1, 1981.

Should you or your staff have any questions regarding this matter, please contact us.

Very truly yours,

  
Peter Zarakas  
Vice President
