Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Varga:

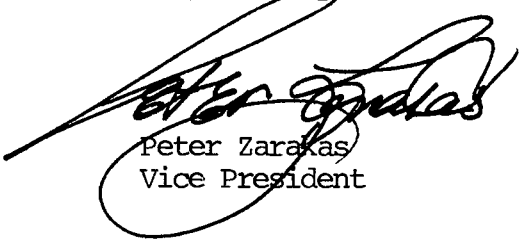

By letter dated May 28, 1980, we indicated that the status of our valve qualification program for the containment purge and pressure relief isolation valves requested by the Commission's September 27, 1979 letter, would be provided by September 2, 1980.

We also indicated that the status of our evaluation considering the issues contained in Standard Review Plan 6.2.4 Rev. 1 and the associated Branch Technical Position CSB6-4 would be provided at that time as well.

Both of these programs are continuing and based upon the status of our in-house effort and that of our valve supplier, it is now anticipated that a response to these issues will be provided by January 5, 1981.

Should you or your staff have any additional questions, please contact us.

Very truly yours,

Peter Zarakas
Vice President
