ATTN: Mr. Thomas M. Novak
Assistant Director for Operating Reactors
Division of Licensing

Your letter of July 21, 1980 to Mr. Peter Zarakas enclosed a request for additional information needed to continue your review of the fracture toughness design of the steam generator and reactor coolant pump supports at Indian Point Unit No. 2. In a letter dated August 28, 1980, we indicated that the information requested was not in our possession and that additional time would be required to generate the response. Enclosure 1 to this letter contains the information requested.

Should you or your staff have any additional questions, please contact us.

Very truly yours,
