Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

ATTN: Mr. Steven A. Varga, Chief
Operating Reactor Branch No. 1
Division of Licensing

Dear Mr. Varga:

It is our understanding that Generic Letter No. 82-16, dated September 20, 1982, was issued and was intended for all PWR Licensees. The letter requested a review of Technical Specifications to determine consistency with the NRC guidance regarding technical specification requirements for NUREG-0737 items. Presently, this office has not received a formal transmittal from NRC of Generic Letter No. 82-16, but the letter was recently made available to us from another source. Accordingly, we expect to reply by May 31, 1983.

In other cases in the past, generic letters were received within the Con Edison organization but not through this office. To prevent this from occurring in the future we request that you issue generic letters addressed to my office.

Should you or your staff have any questions, please contact us.

Very truly yours,

John D. O'Toole
