Re: Indian Point Unit No. 2
Docket No. 50-247

Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

With reference to the Confirmatory Order dated February 11, 1980, Item C.6., "Establish an on-site group reporting to off-site management", effective immediately, Con Edison is changing the On-site Review Committee's (ORC) reporting relationship. ORC will continue to report to off-site management, but instead of reporting directly to the Executive Vice President, Central Operations, will report to the Nuclear Consultant, who, in turn, reports to the Executive Vice President, Central Operations through the Director of Power Generation Services. This change will allow for more effective supervision of the day to day activities of the committee, while at the same time continuing the practice of the Executive Vice President reviewing all recommendations made by ORC. It should be noted that the Corporate Nuclear Facilities Safety Committee also receives a periodic report of ORC activities and recommendations.

Should you or your staff have any questions, please contact us.

Very truly yours,

cc: Senior Resident Inspector
