Director of Nuclear Reactor Regulation

ATTN: Ms. Marylee Slosson, Project Manager
PWR Project Directorate No. 3
Division of PWR Licensing - A

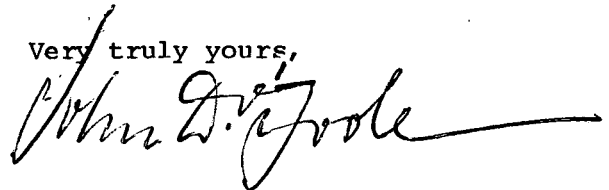

Dear Ms. Slosson:

In our letter of June 18, 1985 we submitted an application to amend the Indian Point 2 Technical Specifications to delete the detailed description of the information to be included in the Monthly Operating Report. The proposed change requested adoption of the Standard Technical Specification format for the Monthly Operating Report.

Your response in the letter dated March 17, 1986 requested that we provide our "commitment to continue use of the report format contained in the September 1977 letter".

By this letter we commit to continue use of the format contained in the September 1977 letter including the "Narrative Summary".

Very truly yours,
