Dear Mr. Selman:

SUBJECT: SEISMIC QUALIFICATION OF THE INDIAN POINT NUCLEAR GENERATING
UNIT NO. 2 AUXILIARY FEEDWATER SYSTEM

By letter dated December 2, 1982 the NRC provided Consolidated Edison with a Technical Evaluation Report (TER) dated October 15, 1982 entitled "Seismic Qualification of the Auxiliary Feedwater System," for Indian Point Unit 3. The TER contained a number of unresolved or open items. Because of the similarity of design between Indian Point Unit No. 2 and Unit No. 3, Consolidated Edison was requested to review the Unit 3 TER and address cited apparent discrepancies relative to Unit 2. By letters dated February 4, 1985, April 9, 1985 and August 14, 1986 Consolidated Edison responded to the request.

Based on the review of your submittals the staff concludes that the seismic qualification of the Indian Point 2 auxiliary feedwater system is acceptable. Our Safety Evaluation is enclosed.

Sincerely,

151
Marylee Slosson, Project Manager
Project Directorate #3
Division of PWR Licensing-A
