Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

In our submittal of February 11, 1987 we informed you that procedures would be issued by July 31, 1987 covering the process described in Attachments 2, 3 and 8 of our revised Procedure Generation Package (PGP). This involves establishing formal procedures for reviewing generic Emergency Response Guidelines (ERG) revisions for plant specific applicability and determining the need to revise Emergency Operating Procedures (EOP) process parameter values for plant modifications. The methodology is established in the ERG executive volume, and our plant specific process used in developing our EOP's is described in the subject attachments to our PGP. While these practices are in place and are used to keep the record current, due to recent personnel changes in our Technical Support department it will not be until October 31, 1987, that the formal procedures will be issued. Our current time table has been previously discussed with Marylee Slosson of the NRC staff.

If you have any questions on this matter, do not hesitate to call us.

Very truly yours,

23.190.7.31.1
