Dennis M. Hussey, Ph.D., CIH, CCMM
Director, Environmental Health and Safety
Goodrich Corporation
Four Coliseum Centre
2730 West Tyvola Road
Charlotte, NC 28217-4578

SUBJECT: NUMBER OF GOODRICH TRITIUM EXIT SIGNS IN NUCLEAR REGULATORY
COMMISSION JURISDICTION

Dear Mr. Hussey:

Thank you for Goodrich's March 13, 2009, response to the U.S. Nuclear Regulatory Commission's Demand for Information concerning the tritium exit sign inventory. I have a follow up request that will help me process your response.

In your response, you said that 91 tritium exit signs are installed in Goodrich locations in nine States: Arizona, California, Colorado, Kentucky, Ohio, and Vermont.

Vermont is the only State regulated by the NRC. My request is that you please respond with a break down of the number of your tritium exit signs in each State, but in particular, please list the number of signs in the State of Vermont.

If you have any questions concerning this request, please contact Angela McIntosh of my staff at (301) 415-5030, or email Angela.McIntosh@nrc.gov. I appreciate your assistance.

Sincerely,

James Luehman, Deputy Director */RA/*
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs
