Re: Indian Point Unit No. 2
Docket No. 50-247

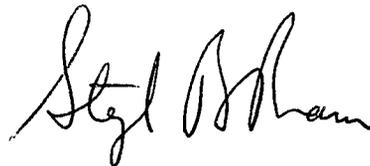

Document Control Desk
U.S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Steam Generator Inservice Inspection: Girth Weld Repair Report.

This letter supplements our submittals of December 11, 1987, December 23, 1987 and January 15, 1988 regarding the linear indications in the Indian Point No. 2 steam generator shell to cone weldment as determined by ultrasonic inspections conducted during the recent refueling outage. In the January 15, 1988 letter, we noted that we would submit a detailed report describing the repair program and our conclusions regarding the cause of the indications. Attached is that detailed report which additionally addresses backup information requested by the staff in Attachment I of their December 24, 1987 SER.

Should you have any further questions, please contact us.

Very truly yours,
