Mr. Stephen B. Bram
Vice President, Nuclear Power
Consolidated Edison Company
of New York, Inc.
Broadway and Bleakley Avenue
Buchanan, New York 10511

Dear Mr. Bram:

SUBJECT: CLOSEOUT OF GENERIC LETTER 89-19, "REQUEST FOR ACTION RELATED TO
RESOLUTION OF UNRESOLVED SAFETY ISSUE A-47 'SAFETY IMPLICATION OF
CONTROL SYSTEMS IN LWR NUCLEAR POWER PLANTS' PURSUANT TO 10 CFR
50.54(f)" (TAC NO. 74952)

Your letter dated March 21, 1990 responded to Generic Letter (GL) 89-19 for the Indian Point Nuclear Generating Unit No. 2. Your response provided information to demonstrate that Indian Point 2 meets the intent of the GL in that the steam generator overfill protection system is implemented and the unit's Technical Specifications include requirements to periodically verify its operability. A detailed technical review of your response has not been performed and therefore approval of your design is neither intended nor implied. However, your confirmation provides an adequate basis to consider NRR's review of your response complete. Further NRC review, if any, will be performed either by inspection or audit.

Sincerely,

ORIGINAL SIGNED BY:

Donald S. Brinkman, Senior Project Manager
Project Directorate I-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
