Dear Mr. Bram:

SUBJECT: INDIAN POINT NUCLEAR GENERATING UNIT NO. 2 RESPONSE TO NRC
BULLETIN 88-10 AND SUPPLEMENT 1 (TAC NO. 71308)

By letter dated April 3, 1989, you responded to NRC Bulletin 88-10. As a result of Supplement 1 to NRC Bulletin 88-10, you determined that a supplement to your original response was required. The supplemental response was provided in a letter dated November 7, 1989. Your responses confirmed that activities required to address the issue of substandard molded case circuit breakers discussed in NRC Bulletin 88-10 have been performed. The NRC staff has not performed a detailed technical review of your responses; however, this area may be subject to audit at a later date. If a subsequent inspection identifies deficiencies in Consolidated Edison's actions or responses, this issue may be reopened. Presently, we consider this action complete.

Please contact me on (301) 492-1402 if you have any questions regarding this matter.

Sincerely,

ORIGINAL SIGNED BY:

Donald S. Brinkman, Senior Project Manager
Project Directorate I-1
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation
