Subject: Quality Assurance Program, Revision 8

Pursuant to 10 CFR 50.54 we are submitting as an Attachment to this letter a description of our current Quality Assurance (QA) Program. Attachment I, entitled "Quality Assurance - Revision 8", contains our revised program and supersedes Revision 7 which was submitted to you on December 27, 1989. Revision 8 incorporates changes previously identified in letters to the NRC dated May 31, 1990, August 24, 1990, and October 29, 1990 as well as other changes. The changes also reflect clarifications discussed in NRC letter to Consolidated Edison dated July 12, 1990. Attachment II entitled, "Summary to Changes" summarizes the key changes made.

We have concluded the changes in Attachment I do not constitute a "reduction in commitment" per 10 CFR 50.54(a)(3). Accordingly, the changes have either been already implemented or will be implemented in the near future. One change, involving deletion of the Manager, Nuclear Power Quality Assurance with these duties being subsumed by the Director, Nuclear Quality Assurance, required a safety evaluation pursuant to 10 CFR 50.59 as this reflects a revision to the Corporate Management Organization chart described in the FSAR.

Should you or your staff have any questions regarding this submittal, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Enclosure
