SUBJECT: IST Program Summary Revision 4 Containing New Relief Requests

As indicated in our October 3, 1989 response to NRC Generic Letter 89-04, we have systematically re-assessed our Inservice Testing (IST) Program scope. The completion of this re-assessment has resulted in changes within the valves portion of the IST Program, which are incorporated into Revision 4 of the IST Program Summary, attached. Changes are identified by revision bars in the margins.

The additions to and deletions from the program scope have led to amending one relief request, adding 9 relief requests and deleting one relief request. We believe that new/amended relief requests 59, 74, 75 and 76 are deemed to be granted in accordance with Generic Letter 89-04 because of their conformance to Attachment 1 to the Generic Letter and/or to the NRC Safety Evaluation Report (SER) dated November 20, 1987 pertaining to the current interval IST Program. We hereby request NRC evaluation of new relief requests 71, 77, 79, 81, 83 and G in accordance with 10 CFR 50.55a(g)(6)(i). The subjects of these relief requests are not addressed in the Generic Letter or the SER. The NRC evaluation is requested by May 31, 1991 so that we can finalize our quarterly testing plans prior to the end of the scheduled 1991 refueling outage.

Should the staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Michael L. Miele
