CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.
INDIAN POINT UNIT 2
WCAP-12244 Revision 3
Addendum 2 to Steam Generator Tube Plug Integrity Summary Report

Dear Mr. Quinn:

At the request of the NRC, Westinghouse has revised and reissued the WCAP entitled "Steam Generator Tube Plug Integrity Summary Report". This most recent revision is designated as WCAP-12244, Revision 3, Addendum 2 (Proprietary) and WCAP-12245, Revision 3, Addendum 2 (Non-proprietary).

This WCAP provides information necessary to ensure compliance with Supplement 2 to NRC Bulletin No. 89-01, dated June 28, 1991. In the WCAP the most recent listing of plug lifetime estimates for all heats of thermally treated Inconel 600 is provided. In addition, a section is included for maintaining an accurate status of plugs repaired and plugs removed from service.

Please find enclosed four copies of WCAP-12244, Revision 3, Addendum 2 for your use.

If you have any questions concerning the attached document, please contact this office.

Very truly yours,

K. F. Matthews
Project Engineer
