Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

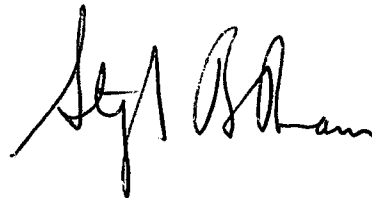

SUBJECT: Close-out for NRC Bulletin 88-11 Pressurizer Surge
Line Stratification

This submittal is in response to your August 22, 1991 letter on the captioned subject and closes out Con Edison's requirements under the subject Bulletin. Pursuant to our letter dated February 4, 1991, Consolidated Edison and the New York Power Authority, the licensee of Indian Point 3, jointly completed the Plant-Specific evaluation of the pressurizer surge line over its design life. This evaluation serves to conclude task 1.d, the final task of the Bulletin.

Attachment I presents the conclusions for Indian Point 2. Attachment II are the proprietary and non-proprietary WCAPS which provide the detailed analyses for task 1.d of the Bulletin. Included with the version as to which Westinghouse asserts proprietary status are a Westinghouse affidavit supporting withholding WCAP-12937 (CAW-97-207), a letter authorizing use of the affidavit by Con Edison, Proprietary Information Notice, and Copyright Notice.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Subscribed and sworn to
before me this 1ST day
of October, 1991.
