OPA Action Item
09-021
Due 9/9/09

OFFICE OF THE SECRETARY
CORRESPONDENCE CONTROL TICKET

Date Printed: Aug 19, 2009 09:57

PAPER NUMBER: LTR-09-0416 **LOGGING DATE:** 08/19/2009

ACTION OFFICE: OPA / EDO

AUTHOR: Robert Cloud

AFFILIATION: VA

ADDRESSEE: Dale Klein

SUBJECT: Provides a possible patent on how to dispose of nuclear waste

ACTION: Appropriate

DISTRIBUTION:

LETTER DATE: 08/05/2009

ACKNOWLEDGED No

SPECIAL HANDLING: OPA/EDO for Approp.Action.

NOTES:

FILE LOCATION: ADAMS

DATE DUE: **DATE SIGNED:**

HELEN & BOB CLOUD
1546 SANGERS LANE
STAUNTON, VA 24401
540-886-5420

August 5, 2009

Dear Dr. Klein,

I have just finished reading the NRC Information D igest and I loved it!
You see I was born in E l Paso Texas in 1933, and after I got out of high school in 1951, I went to college at Texas A and M where I studied mechinancal engineering and I got out in 1955. Then I married my present wife Helen in Houston on June 9, 1955.

After we were married we drove north to A and M where we lived in a garage apartment at the souath gate. That year Helen worked for the college and I got my masters degree in M.E.. Then I got a job with Westinhouse Electric Co. in Pittsburgh Pa. Working on nuclear power plants but I continued going to school and got my PhD from the Universisty of Pittsburgh in 1964.

Then Dr. Klein I spent all the rest of my life building and designing nuclear power plants! I had a very good life!

Now while I was working for Westinghouse as a seismic engineer I invented a device to take the place of oil filled shock absorbers. It looks like a shock absorber but it is filled with air! It has stops inside it and it works just fine. My patent is filed under the name "Limit Stops"

Now in my old age I have another idea on what to do with nuclear waste. My idea is as follows and I do not know if it is patentable, but here it is, Take the waste and put in in round spherical steel containers, and tehen seal it up. Then take the waste filled sphere and wrap iat with lead, and then take a lot of these on a ship and have the ship go out onto the surface above the deepest part of the ocean and then dump the waste into the ocean and it will sink down to the bottom of the sea, where the water is very compressive and the water will squeeze the waste into little lead covered balls! Perfectally harmless!

Dr. Klein that is my idea so if you can
please find out if it is patentable!
Dr. Klein if you get this letter please
dear sir reply-reply!
Yours Truly

Robert Lea Cloud

Dr. Robert Lea Cloud

~~little lead covered balls, perfectly harmless!~~

y good life!
