SUBJECT: Submission of Simulator Facility Certification

REFERENCE: NRC letter dated March 25, 1991, R. Capra to S. Bram, entitled "Exemption from the Requirements of 10 CFR 55.45(b)(2)(iii) and (iv) for the Plant Simulator (TAC No. 77501)

In accordance with the above referenced correspondence, Con Edison hereby submits the documentation for certification of the existing Indian Point Unit 2 plant reference training simulator. As discussed at a meeting between NRC and Con Edison representatives on December 5, 1991, certification of the existing simulator, with exceptions to ANS 3.5-1985 and Regulatory Guide 1.149, has become necessary until the new simulator is received. Upon qualification of the new simulator, a replacement certification will be submitted which will remove the exception currently taken to ANS 3.5-1985 and Regulatory Guide 1.149 which are discussed, as applicable, in the attached documentation.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,
