One week look ahead item for GE-Hitachi:

On July 17, 2008, staff of the Office of Nuclear Material Safety and Safeguards and the Office of Federal and State Materials and Environmental Management Programs (FSME) will hold a pre-application public information meeting in Wilmington, North Carolina, to discuss NRC's licensing process. In April, GE-Hitachi announced plans to build a laser-based uranium enrichment facility near Wilmington. During the week of July 14, FSME staff will meet with several Federal, State, and Local agencies regarding the potential license application and NRC's environmental review process.
