Re: Indian Point Unit No. 2  
Docket No. 50-247

Document Control Desk  
US Nuclear Regulatory Commission  
Mail Station P1-137  
Washington, DC 20555

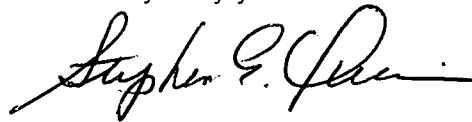

SUBJECT: Implementation of Technical Specification Amendment 165

The purpose of this letter is to advise you that the Technical Specification Amendment No. 165 to Facility Operating License DPR-26 for the Indian Point Nuclear Generating Unit No. 2 has been implemented.

Amendment No. 165 revises the Technical Specifications to amend the 480V Emergency Bus Undervoltage actuation setpoint. This setpoint required a modification which necessitated a plant shutdown to incorporate. These modifications were implemented in our most recent refueling outage which was completed on June 6, 1995.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

cc: Mr. Thomas T. Martin  
Regional Administrator - Region I
