Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Changes In Technical Specification Surveillance
Intervals to Accommodate a 24 Month Fuel Cycle

REFERENCE:

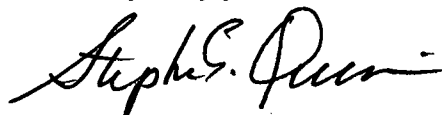

- 1) Con Edison Letter dated August 5, 1994, S. B. Bram to Document Control Desk, Same Subject
- 2) Con Edison Letter dated November 17, 1994, S. E. Quinn to Document Control Desk, Same Subject
- 3) Con Edison Letter dated December 2, 1994, S. E. Quinn to Document Control Desk, Same Subject
- 4) NRC Letter date March 26, 1996, J. F. Harold to S. E. Quinn

By Reference 1, we transmitted an Application for Amendment to the Operating License for the subject proposed Technical Specification changes. This application was supplemented by references 2 and 3.

The purpose of this letter is to transmit revised Technical Specification pages Attachment A. These pages have been reconciled with the most current amended Technical Specifications and contain no new changes other than those already set forth in our pending referenced application. By Reference 4, the NRC issued Amendment No. 186 approving the relocation of the IP-2 Fire Protection requirements from the Technical Specification to the IP-2 Fire Protection Program Plan. Accordingly, we have added a note to Technical Specification Section 4.14 indicating that this section will be removed upon implementation of Amendment 186. In addition, we are transmitting a revised Safety Assessment, Attachment B, as committed in Reference 3.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Attachment
