SUBJECT: Response to Request for Additional Information (RAI), Steam  
Generator Tube Acceptance Criteria Technical Specification  
Amendment Request

By letter dated July 29, 1996, the Nuclear Regulatory Commission (NRC) requested additional information from Consolidated Edison Company of New York, Inc. (Con Edison) to finalize its review of Con Edison's proposed amendment to Technical Specifications involving steam generator tube sleeving. Con Edison responded to this RAI by letter dated August 7, 1996 and was again requested, by subsequent telephone conversation, to provide additional information concerning the tube sleeve inspection program expansion criteria. Enclosure 1 to this letter is a revised Technical Specification Section 4.13 which clarifies the program expansion criteria.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

*Stephen E. Quinn*
