Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Revised Completion Date for Severe Accident Management
Guidance (SAMG)

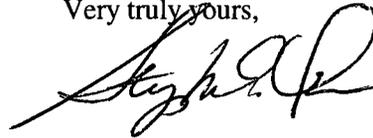

REFERENCE: Con Edison letter dated March 28, 1995

Con Edison formally notified the NRC in the referenced letter of its intent to complete the assessment of severe accident management capabilities and make any identified enhancements by November 30, 1997.

This letter is to inform the NRC that our intended date for completion has been revised and is now on or before June 30, 1998. Con Edison's assessment of severe accident management capabilities will be completed by November 30, 1997, with the exception of training. The extension of the scheduled completion date is necessary to facilitate the extensive training of personnel.

Should you have any questions regarding this matter, please contact Mr. Charles Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

C: Mr. Hubert J. Miller
