Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Changes to Technical Specifications to Clarify
Offsite Power Availability Requirements and Revise
Emergency Diesel Generator Fuel Oil Availability
Requirements

REFERENCE:

- 1) Con Edison letter dated July 8, 1994, S. B. Bram to Document Control Desk, Same Subject as above.
- 2) NRC letter dated December 23, 1994, C. J. Cowgill to S. E. Quinn, NRC Region I Resident Inspection Report No. 50-247/94-18.
- 3) Con Edison letter dated August 13, 1996, S. E. Quinn to Document Control Desk, Same Subject as above.

By Reference 1, we transmitted an Application for Amendment to the Operating License for the subject proposed Technical Specification changes.

Transmitted herewith are proposed technical specification page changes (Attachment A), Revised Safety Assessment (Attachment B) and Updated Summary of the Proposed Change (Attachment C). The revised Technical Specification pages do not consider the RESCO plant as a 138 kV source of power. The revised pages also clarify offsite power availability requirements and the use of Indian Point Unit 3 13.8 kV power. Additionally, the revised Technical Specification pages also address emergency diesel generator fuel oil availability requirements and required safeguards when a diesel is inoperable.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

Paul H. Kinkel
