(Licensee Event Report 97-011-00), dated July 28, 1997.

Dear Sir:

This letter is to inform you that the New York Power Authority has completed the requested actions of Generic Letter 96-01 (Reference 1) as previously committed in Reference 2. The Authority performed a drawing-to-procedure comparison review to determine if surveillance procedures for specified logic circuits adequately fulfill Technical Specification testing requirements. The review included logic circuits and test procedures for the reactor protection system, engineered safety feature actuation system, and emergency diesel generator load shedding / load sequencing logic. Several surveillance test procedures were revised based on the results of the comparison review. Logic circuit testing using the revised procedures was completed during August 1997 while Indian Point 3 was shut down for Refueling Outage 9.

Reference 3 contains additional information regarding review findings that were reported in accordance with 10 CFR 50.73. The Authority is making no new commitments in this letter. If you have any questions, please contact Mr Ken Peters.

Very truly yours,

Robert J. Barrett

James Comiotes, being duly sworn, deposes and says:

I am the acting Site Executive Officer of the Indian Point 3 Nuclear Power Plant of which the Power Authority of the State of New York is the owner and operator under Facility Operating License DPR-64. I have read the foregoing "Completion of Generic Letter 96-01 Activities; Testing of Safety-Related Logic Circuits" and know the contents thereof; and that the statements and matters set forth therein are true and correct to the best of my knowledge, information and belief.

James Comiotes

Subscribed and sworn to before me

this 19 day of September 1997.

Barbara Ann Taggart
Notary Public
