

BEFORE THE UNITED STATES  
ATOMIC ENERGY COMMISSION

In the Matter of )

Consolidated Edison Company )  
of New York, Inc. )

Docket No. 50-247

(Indian Point Station, Unit No. 2) )

PETITION REQUESTING EXTENSION

OF

COMPLETION DATE

Pursuant to Section 50.55(b) of the Commission's regulations, Consolidated Edison Company of New York, Inc., Applicant in the above-captioned proceeding, hereby requests that the latest completion date for its Indian Point Station, Unit No. 2 specified in Provisional Construction Permit No. CPPR-21 (as previously extended by orders of the Commission dated May 19, 1969 and May 12, 1970) be further extended from June 1, 1971 to December 1, 1971. Applicant believes that Unit No. 2 could be completed such that an operating license could be issued shortly before June 1, 1971. Nevertheless,

PDR ADDCK 05000247  
P PDR

1806

Applicant believes that the following good cause exists for the requested extension of the completion date:

1. Such an extension would make allowance for possible delays in completion due to construction difficulties which are not presently anticipated;

2. The duration of the pending proceeding for issuance of a facility operating license for Unit No. 2 is uncertain. This is due mainly to the contested nature of the proceeding.

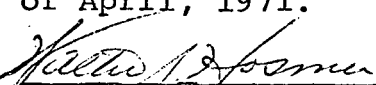

CONSOLIDATED EDISON COMPANY  
OF NEW YORK, INC.
