Docket No. 50-247

APPLICATION FOR AMENDMENT  
TO OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission (NRC), Consolidated Edison Company of New York, Inc. ("Con Edison"), as holder of Facility Operating License No. DPR-26, hereby applies for amendment of the Technical Specifications contained in Appendix A of the license. Specifically, Consolidated Edison requests that the changes specified in Attachment I be approved. This amendment request provides an administrative change to the Technical Specifications.

The specific proposed Technical Specification revision is set forth in Attachment I to this application. A safety Assessment of the proposed changes is set forth in Attachment II to this Application. This assessment demonstrates that the proposed changes do not represent a significant hazards consideration as defined in 10 CFR 50.92(c).

As requested by 10 CFR 50.91(b)(1), a copy of this application and our analysis concluding that the proposed changes do not constitute a significant hazards consideration have been provided to the appropriate New York State official designated to receive such amendments.
