Re: Indian Point Unit No. 2
Docket No. 50-247

Document Control Desk
US Nuclear Regulatory Commission
Mail Station P1-137
Washington, DC 20555

SUBJECT: Proposed Changes in Technical Specification
Surveillance Intervals to Accommodate a 24 Month
Fuel Cycle

Technical Specification 4.8.A.1 addresses surveillance testing of the Auxiliary Feedwater System in two paragraphs. The second paragraph was initially addressed in our Technical Specification Amendment Submittal of May 29, 1992 and the first paragraph in our submittal of November 25, 1992. Both amendment requests were subsequently approved.

By error, the amendment request of November 1992 was duplicated in our amendment request of October 29, 1993. Due to approval of the earlier amendment request our October 29, 1993 submittal concerning the Auxiliary Feedwater System is hereby withdrawn.

Should you have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety and Licensing.

Very truly yours,

cc: Mr. Thomas T. Martin
