FITNESS-FOR-DUTY SUMMARY AND MANAGEMENT ACTIONS

This report covers Fitness-For-Duty activities at Indian Point Station, Units 1 and 2, from January 1, 1994 through June 30, 1994. A total of 737 drug and alcohol tests were conducted during this report period. 380 were initial or pre-access tests and 357 were random tests. The plant population was constantly monitored and tracked to ensure that on an annual basis random drug testing was being conducted at a rate equal to at least 50% of the total unescorted work force.

There were some very favorable program results during the reporting period. No licensee personnel tested positive. There was only one (1) confirmed positive pre-access drug test involving a station cleaner contractor employee who was waiting to be cleared for unescorted access. As a result, the contractor employee's access was denied. There were no positive tests resulting from random testing and there were no positive tests for alcohol.
