Re: Indian Point Unit No. 2  
Docket No. 50-247

Document Control Desk  
US Nuclear Regulatory Commission  
Mail Station PI-137  
Washington, DC 20555

SUBJECT: Response to US Nuclear Regulatory Commission Letter on  
Consolidated Edison's 60-day Response to Generic Letter  
96-05

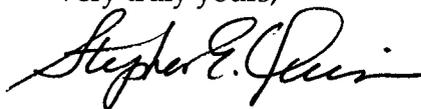

Pursuant to 10 CFR 50.54 (f), this letter provides Consolidated Edison's  
(Con Edison) 60-day written response to Generic Letter (GL) 96-05.

GL 96-05, "Periodic Verification of Design-Basis Capability of  
Safety-Related Motor-Operated Valves," dated September 18, 1996,  
requests certain actions be taken by utilities to establish, or ensure  
effectiveness of programs, to verify on a periodic basis that safety-related  
motor-operated valves (MOVs) continue to be capable of performing their  
safety functions.

Con Edison plans to comply with the actions requested in GL 96-05. Con  
Edison is a member of the Westinghouse Owners Group (WOG), which  
has established a group tasked to develop a generic WOG program in  
response to this generic letter. Periodic verification of safety-related  
(MOVs) was previously addressed in response to GL 89-10. Our schedule  
for reviewing this program in light of the WOG activity and GL 96-05 is  
180 days from the issue date of GL 96-05. Con Edison also plans to submit  
a summary of program changes for Indian Point No. 2 within the 180-day  
response period set forth in GL 96-05.

Should you or your staff have any concerns regarding this matter, please  
contact Mr. Charles W. Jackson, Manager, Nuclear Safety & Licensing.

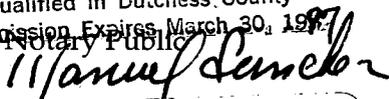

Very truly yours,

Subscribed and sworn to  
before me this 18<sup>th</sup> day  
of November 1996.
