Hello Mr. Torres.

The answers to your questions are down below. Please let me know if you need more info.
Melvin Bovey

Subject: Request for additional information

Mr. Bovey:

I have completed the technical review of the renewal application of NRC License 11-27601-01. The application lists you as point of contact. Please provide the following information in support of the renewal application.

1. State what radionuclides are currently being used (Tc-99m, Tl-201, Ga-67, other?). Do you use PET material (F-18, O-15, C-11)? Tc-99m, Tl-201 for diagnostic as needed; Cs-137 150 uCi, Co-57 20 mCi (usually 10 mCi) for quality assurance; No...we do not use PET materials.
2. Do you use any pre-packaged kits for "in-vitro" studies under 10 CFR 31.11? See link. NO!
<http://www.nrc.gov/reading-rm/doc-collections/cfr/part031/part031-0011.html>
3. Reed J. Harris is listed as D.O. in the NRC license but is listed as M.D. in St. Luke's website. Please clarify if Dr. Harris is D.O. or M.D. D.O. would be correct; St. Lukes has it wrong!
4. Do you have any radionuclide in sealed source form equal or greater than 30 millicuries each that is used for calibration, transmission and/or reference source, for example to do QC of the gamma camera (i.e., Cobalt-57 flood source in excess of 30 millicuries, Gd-153 attenuation, etc.). If the answer is yes, provide manufacturer's name and model number. NO!

Thank you.
