Document Control Desk **US Nuclear Regulatory Commission** Mail Station P1-137 Washington, DC 20555-0001

Subject:

Qualification Summary Report for Passive Autocatalytic Recombiner

Reference:

Con Edison Letter to USNRC dated 5/2/97

As discussed in Con Edison's response to a NRC request for additional information, we committed to include the passive autocatalytic recombiners in the Indian Point 2 (IP-2) Environmental Qualification (EQ) program. Since these recombiners are to be credited for post-accident hydrogen control, they have been tested in accordance with IEEE 627 and 344. Attached for your information is the qualification summary report for the passive autocatalytic recombiners (PAR). This report summarizes the results of the environmental qualification testing performed by Wyle Laboratories on the IP-2 passive autocatalytic recombiner. The Wyle EQ test report is available at Con Edison for your review.

Con Edison is making no new regulatory commitments in this correspondence.

Should you or your staff have any questions regarding this matter, please contact Mr. Charles W. Jackson, Manager, Nuclear Safety & Licensing.

> Very truly yours, A. Alex BO
