March 16, 1995

Mr. Stephen Quinn
Vice President - Nuclear Power
Consolidated Edison Company of
New York, Inc.
Indian Point 2 Station
Broadway and Bleakley Avenue
Buchanan, NY 10511

SUBJECT: NRC REGION I RESIDENT INSPECTION REPORT NO. 50-247/95-02

Dear Mr. Quinn:

This letter transmits the findings of the safety inspection conducted by Mr. G. Hunegs and R. Fuhrmeister of this office from January 8, 1995 to February 11, 1995, at the Indian Point 2 Nuclear Power Plant, Buchanan, New York. At the conclusion of the inspection, these findings were discussed by Mr. Hunegs with you and members of your staff.

Areas examined during this inspection are described in the NRC Region I Resident Inspection Report which is enclosed with this letter and were selected in order to ensure that your facility is operated with due regard for the public health and safety. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

Overall, the NRC has concluded that your facility was operated safely.

We noted your staff identified that a security guard improperly entered an area posted as a high radiation area. In addition to the identification of improper entry, we determined you have completed appropriate corrective action to prevent recurrence. Also, the actual event had minor safety significance since the area was not an actual high radiation area and the individual did not receive any radiation dose. Therefore, the violation will not be cited because the criteria for discretion specified in the NRC Enforcement Policy Section VII.B, were met.

Your cooperation is appreciated.

Sincerely,

Original Signed by:

Curtis J. Cowgill, Chief
Projects Branch No. 1
Division of Reactor Projects
