Subject: New license clarification of RAI
(NOTE: This will be used as the Documents Title in ADAMS)

I informed the RSO that we could give the license the flexibility to make program/procedure changes without making them a Type A broadscope license as they had requested in their letter. They would still need to submit more detail regarding the matter. I also told him we would like to change the license condition regarding authorized users to make the license consistent with their program code. This would remove them from being a Type B broadscope license. This would require the licensee to submit additional information. I informed the RSO I would send out a request for additional information regarding these two issues. I also informed the RSO that in order to address these two issues on the current licensing action the reply would need to be received by March 1, 2010.
