Subject: **Indian Point 3 Nuclear Power Plant**
Docket No. 50-286
Proposed Changes to the Technical Specifications
Concerning the Safety Review Committee (SRC)

Dear Sir:

This application for an amendment to the Indian Point 3 Technical Specifications proposes to modify the membership and record keeping requirements of the Safety Review Committee (SRC). The proposed amendment is, in part, the result of an organizational change at the Authority's headquarters office in White Plains which eliminates the position of Vice President - Nuclear Support. It is also proposed that the time frame for preparing records of SRC activities be changed and made consistent with the current Westinghouse Standard Technical Specifications (NUREG-1431).

Enclosed for filing is the signed original of a document entitled, "Application for Amendment to Operating License," together with Attachments I and II, comprising a statement of the proposed changes to the Technical Specifications and the associated Safety Evaluation. Attachment III contains the commitments made by this submittal.

In accordance with 10 CFR 50.91, a copy of this application and the associated attachments are being submitted to the designated New York State official.

If you have any questions, please contact Mr. P. Kokolakis.

Very truly yours,

A handwritten signature in black ink, appearing to read 'R. Beedle', written over a horizontal line.

Ralph E. Beedle
