)
)
Docket No. 50-286

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission (NRC), the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-64, hereby applies for an Amendment to the Technical Specifications contained in Appendix A of the license.

This application for an amendment to the Indian Point 3 Technical Specifications proposes to revise Sections 6.5.2.2 and 6.5.2.10. Changes to SRC membership are proposed to delete reference to the Vice President-Nuclear Support, establish Quality Assurance department representation at the Vice President level instead of at the Director level, and add a second consultant. The position of Vice President-Nuclear Support at the Authority is being eliminated as a result of a management reorganization. Establishing QA representation at the Vice President level will provide a more uniform level of management attention to SRC activities. Adding a second consultant will enable the Authority to make better use of expertise available in the industry, as needed, to address specific topics.

Another change involves the time limit for preparing SRC meeting minutes and reports of review/audit activities performed by SRC. The proposed change is consistent with the current Westinghouse Standard Technical Specifications (NUREG-1431).

The proposed changes to the Technical Specifications are included as Attachment I to this application and the Safety Evaluation is included as Attachment II.
